Per Scholas /General Assembly 2017

Web Development Immersive program
Manhattan, NY.

Santiago Tech University 2009

B.S., Information Systems Engineering
Santiago, D. R.

WEB DEVELOPMENT PROJECTS

Places to go: Web application for travelers to find places they should visit in a certain location, and where the user can have traveler journal . Created using Express and postgresql.

Lager Logger: Application created to keep track of the beer sales in NY and California, where I worked along with a UX design team, the client and a team of web developers. Created using React, Express, and postgresSQL

Okurio: Project management application, for managers to follow the flow and status of each team member's work, where users can create projects , add collaborators to the projects and assign tasks to the collaborators.

Nov 2009-Sep 2016

Advansys S.R.L : IT service company specializing in CRM systems and Banking systems.

Information systems Analyst-Programmer

Worked day to day on changes, enhancements and adaptations of a CRM system and a Banking system, following a structured plan created depending of the complexity of the requirements, using VB 6.0 , VB .Net, MS SQL and Crystal reports. Created new modules and utilities for the interaction between the company's softwares and external software. Data migration from other softwares and databases, to the company's Softwares.

Quality assurance analyst

Ensured that the finished requirements functioned properly, complied with the company's rules and the user's expectations, and had a user friendly interface.

User support specialist / user support call center assistant

Software troubleshooting, configuration and documentation, user training, reports configuration and software manual documentation. Software and data base updates. Received new requirements from current customers, assisted users remotely using team-Viewer.

May 2007–Nov 2009
